

Interested in a future of ROBOTS and HUMANS working together?

Want the chance to earn a \$20 Starbucks gift card?

Join our research study on physical human-robot coordination!

Description: We are looking for participants in a study on measures of human-robot physical coordination. In the task, you will work with a robot arm to transport objects under different environments. After interacting with the robot, you will be asked to fill out a questionnaire about yourself and your experience with the robot. Participation is voluntary.

The study will take less than one hour and will be held at the Polytechnic campus. All participants who complete the study will be entered in a drawing for **one of eight** \$20 Starbucks/Amazon gift cards!

Eligibility: You must be 18-55 years old, able to communicate in English, and feel comfortable moving 10 pounds with one hand and no aids. You must have no previous direct interaction with robotic systems. Due to safety considerations, pregnant women are not eligible for this study. The study is on a first-come-first-serve basis, and is expected to continue until the end of October, 2017. Transportation to the study site must be self-arranged.
