

FSE 301

Hacking for Defense: Lean Startup Methodology

New Online Summer B Course

FSE 301 - Any Undergraduate Student (campus-based students 48286, online students 48287)

Why take this course?

Students work on **real** national security issues, with **real** national security leaders. Students work and solutions have real-world impact by working with government partners in the **Department of Defense (DoD)** and the **Intelligence Community (IC)**.

What will I get out of this course?

Students will learn the **Lean Startup methodology** and how to build **efficient** and **successful startups** and develop skills to solve problems in any organization. They will also learn how to apply **Lean Startup principles** to **discover** and **validate customer needs** and to **continually refine solutions**.

Where can I get more information?

For more details, visit h4d.us/. If you have any **questions or difficulty enrolling**, please reach out to jason.bronowitz@asu.edu.

Today if college students want to give back to their country they think of Teach for America, the Peace Corps, or Americorps. Few consider opportunities to make the world safer with the Department of Defense, Intelligence Community, and other government agencies. The Hacking for Defense class will promote engagement between students and the military and provide a hands-on opportunity to solve real national security problems.
