

# SHS 461 Accent Modification

## LEARN METHODS TO IMPROVE YOUR ENGLISH PRONUNCIATION

### ACCENT MODIFICATION COURSE OFFERED BY THE COLLEGE OF HEALTH SOLUTIONS SPEECH-LANGUAGE HEARING PROGRAM **Individual Training via Zoom**

Experience the evidenced-based clinical methods speech pathologists use to help you acquire the sounds of American English. Learn how to increase your comprehensibility to support your personal quest. Whether it's to integrate with native English speakers in social settings or enhance your interviewing and presentation skills, we are here to help.

This course offers online lectures with practice content that are necessary to apply during your individual weekly lab sessions (conducted virtually). The first session will consist of an assessment of American English sounds that already exist in your inventory and sounds you still need to acquire. This will help us devise a treatment plan specifically for you. You will be working with graduate and undergraduate speech-language pathology students under the supervision of licensed and certified faculty members who will oversee your development.

Don't wait to register until the last minute. Take advantage of every minute of your training. We look forward to seeing you in the spring!!!

\*If you are unable to register for not meeting the 45 credit requirement, please email Ileana Ratiu for a waiver.

### Registration details

Lecture via Online

Course: SHS 461

Class #: 15189

### Lab Options via ASUSync

Day/Time: F 9:00am-10:15am\*

Class #: 22677

Day/Time: F 10:45am-12:00pm\*

Class #: 22679

\*above lab times were increased to 1hr. 15 mins. vs 50 mins. for additional practice.
