Human-computer interaction in

Seoul, South Korea

May 23–June 6, 2026

Earn 3 credits, take IFT 301 Web Programming for Human Computer Interaction or HSE 325 Human-Computer Interaction

Faculty leads: Assistant Teaching Professor Justin Shewell and Assistant Professor Heejin Jeong

This program offers students the opportunity to explore **human-computer interaction (HCI) design and development** in South Korea, with a strong focus on the country's unique cultural and economic context. Given South Korea's role as a hub for **global tech innovation**, students will gain valuable insights through site **visits to leading companies and guest lectures from industry professionals** and engineering faculty.
