

DESIGN FOR DANGER HACKATHON

Have you considered how much work goes into making everyday products safe to use? Some products require the use of **corrosive chemicals or radioactive materials**. How can we **protect manufacturers from long-term risks**?

Devils Invent: Design for Danger asks students to come up with unique ideas for **designing for these dangerous situations**, rather than focusing on a safe end product.

RSVP HERE!

March 20th-22nd, 2026

Starts at 6:00 PM on March 20th

ISTB 12, ASU Polytechnic Campus
